# **INFORMATION TECHNOLOGY**

Students studying Information Technology develop skills they can use throughout their personal and professional lives.

## **Problem solve**

Would you like to know how computers work? How to upgrade hardware and install software? What computer is right for the job? This course could be for you.

## **Create and contribute**

You may have surfed the net or downloaded software but how about developing IT solutions to solve real world problems. Be a creator of software and websites, not just a consumer.

## **IT in business:**

In small businesses it can be expensive and debilitating if you don't know how this technology works.

In big business it can take you to the ends of the earth - and provide an opening to a limitless amount of job opportunities.
